
Next Match Window

Posted by scrappy - 2006/10/22 23:14

Check out the next match window to the left. It has a lot of kinks in it, but hopefully they can be worked out.

I want to remove the "next match" heading
Center the window in the window (hope that makes sense)
Have team names under respective team windows
Take out the Draw in W/D/L
Clickable logos

Not sure if that will be above my head, but maybe I can do that. It may take a bit though, because I have a lot going on right now with school.
